

## **Schedule of System Maintenance Studies for FY 2004-2005**

The Compensation team in the Department of Personnel and Administration (DPA), Division of Human Resources (DHR) maintains a list of all major system maintenance studies scheduled for the current fiscal year. System maintenance studies analyze occupations to determine if classes and/or pay grades are accurate, including conversion by class or position.

### **New Studies**

#### **EPS Occupational Group**

This study will clarify the Enforcement and Protective Services occupational group definition to accommodate peace officer definition changes in recent statute. No consolidation or class series modifications will be made. No classes will be moved to or from the EPS occupational group. This study will be an occupational group definition change only and will keep the current structure intact. Travis Engelhardt is leading the study.

(Updated 7/13/04)

#### **Lottery Sales Representative**

In response to a recent audit of the State Lottery, a study of the current pay structure and commission plan practice will be conducted. Travis Engelhardt is leading the study.

(Updated 7/13/04)

#### **Abolishment of Vacant Classes**

This is annual abolishment of vacant classes and will occur early 2005.

(Updated 7/2/04)

### **Current Studies**

#### **PSE Salary Watch**

The Physical Science and Engineering occupational group study will continue for the next fiscal year and involves monitoring salary trends as identified during the FY-02 PSE Consolidation Study. Classes include Electronic, Electrical, and Mechanical Engineers, Environmental and Physical Scientists, Landscape Architects, Actuaries, Statistical Analysts, and Civil Engineering Project Managers. Don Fowler leads the study team.
